

October 14, 1997

John,

Enclosed are the pack labels for each TSM. They are divided into sets of 50 with 10 labels per page which gives each TSM 500 labels (100 extra). Wanted to make sure they all have ample amount in case anything goes wrong. Please tell each TSM that the label needs to be applied beneath the tear tape. Each pack has to be opened by our laboratory personnel and cigarettes removed for testing. All sampled packs have to be retained (within a cold storage area) with the affixed label intact.

Thanks, "Liz"
